OBJECTIVE

Aspiring **Software Engineer / Full Stack Developer** with strong proficiency in the MERN stack and Data Structures & Algorithms (700+ problems solved), experienced in designing RESTful APIs and building scalable, secure web applications. **AI/ML enthusiast** with hands-on experience in Python-based machine learning and integrating AI-driven features into full-stack projects, driven by clean code practices and continuous learning.

EDUCATION

Bachelor of Technology , National Institute of Technology Patna	2023 – 2027
Electronics and Communication Engineering	CGPA: 8.25

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript (ES6+), Python, SQL, Java (basics)

Web & Backend Development: HTML5, CSS3, React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS

Databases: MongoDB, MySQL

APIs & Authentication: RESTful APIs, JWT Authentication, Role-Based Access Control, Session Management

AI / Machine Learning: Python, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow; Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation

Tools & Platforms: Git, GitHub, Postman, VS Code, Vercel, Render, Cloudinary

Core Competencies: Data Structures and Algorithms, System Design Basics, CRUD Operations, API Design, Responsive Web Design

PROJECTS

Underwater Image Enhancement using Deep Learning	March 2026
---	------------

Technologies: PyTorch, Python, OpenCV, CUDA, GAN

[GitHub](#)

- Implemented a GAN-based underwater image enhancement system using a custom **CMRRCU-Net** architecture in PyTorch.
- Trained an end-to-end image restoration model to improve underwater image clarity, contrast, and color correction.
- Integrated adversarial, L1, and gradient-based loss functions to preserve image details and visual quality.
- Optimized GPU-based training and evaluation pipelines using PyTorch and OpenCV.

Hostel Hungry: Real-time Food Delivery Platform

Jan 2026

Technologies: MongoDB, Express.js, React.js, Node.js, Socket.io, Google Maps API

[GitHub](#)

- Architected a **scalable three-tier MERN** application supporting Customer, Restaurant, and Delivery Partner workflows.
- Enabled **real-time order tracking** and instant notifications using **Socket.io** with bi-directional communication.
- Integrated **Google Maps** and geolocation APIs for automated nearby restaurant discovery and live rider tracking.
- Strengthened platform security with **Email-based OTP verification** and **JWT authentication**.

CERTIFICATIONS

- **HackerRank Java (Basic)** Certification — March 2025
- **NPTEL Joy of Computing Using Python** — Scored **91%+** (**Elite + Gold**)
- **NPTEL Cloud Computing** — with focus on **Cloud Architecture**

ACHIEVEMENTS

- Solved **700+** **Data Structures and Algorithms** problems on **LeetCode** and **GeeksforGeeks**.
- Achieved **LeetCode** rating of **1720+**, demonstrating strong **competitive programming** skills.

POSITIONS OF RESPONSIBILITY

- | | |
|--|--------------------|
| • DSA Team Member, Web and Coding Club, NIT Patna | Oct 2024 – Present |
| • Technical Team Member, Tinkering Lab, NIT Patna | Mar 2024 – Present |
